Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 April 2004.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 21-40 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 21-40 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 12 April 2004 and 16 August 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 24, 31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Recitation " the circulating in communication with the formation" is indefinite for lacking proper antecedent basis. Claim 31 is also indefinite since it depends from a canceled claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 21- 27, 30-35, 38-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Hooper (US 4,630,691).

Hooper discloses an annulus bypass peripheral nozzle jet pump pressure differential drilling tool specifically shown in Fig 7, which comprises all of the claimed structure and method of using the same including a drill bit 18 mounted to a drill string, bypass means 10, 11 for circulating drilling fluid down through the drill string to exit the string adjacent the drill bit and then upwards through the annulus between the string and bore wall. The means for adding energy to the drilling fluid is met by the

combination of the jet pump J and the plug-stabilizer P which generate a pressure differential in the annulus such that the pressure of the drilling fluid above said means is higher than the drilling fluid pressure below (see col. 2, lines 11-17), which is in communication with the formation. The claimed hydrocarbon formation in the respective claims is anticipated, since Hooper apparatus is for oil well drilling. The one or more pump is met by the jet pump J, which is operated by drilling fluid.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 28, 29, 36-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hooper '691.

The recited electrical pump, drill string driven pump or a turbine driven pump in the respective claims has merely provided an obvious designed possibility without any structural or functional significant in creating an underbalanced pressure at or near the drill bit, which in the examiner's view has failed to render a patentable distinction, since it has been held that a limitation of the claimed combination which present no novel or unexpected result over a similar feature used in the prior art references, and solved no stated problem, was merely an obvious matter of design choice within the skill of the art.
